

Data Sheet

1m Over Fascia & Felt Support Ventilation System

Low profile combination ventilation system for above the fascia board

Application

- For roof eaves ventilation
- To offer multi-function all in one over fascia ventilator
- To form clear and regulated free airspace over the fascia board
- To form eaves to eaves and eaves to ridge cross flow ventilation
- Suitable for use with both full replacement fascia boards and capping fascia of all sizes
- To allow 10,000mm² airflow entry between fascia and roof membrane/felt

Product Features & Benefits

- Supplied in convenient 1m lengths
- Interlocking design
- Multi-functional with combined over fascia vent, felt support tray & comb filler
- Clear fixing points to fix direct to top of fascia board
- Discreet low-profile design
- Unique 'split skirt' feature which allows easy installation of gutter brackets
- Integral flyscreen at 4mm
- Robust design to take loads from concrete tile and slate roof finishes
- Complies with building regulation Approved document C2
- Meets requirements of BS5250:2021 Management of moisture in buildings
- Lightweight and resistant to corrosion and rotting
- With or without comb filler

Materials

- Manufactured in Black recycled Polypropylene

Installation Guide

- Use 10mm/10,000mm² airflow product to ventilate pitched roofs >15 degrees when the roof void is loft space
- Fix each ventilator into the top of the fascia board using screws or nails through fixing holes provided
- Lay roof membrane/felt onto felt support tray to prevent sagging and causing air flow blockage and/or water ponding.
- Cut the roofing membrane/felt back flush with the edge of the fascia board, so not to dress into the gutter. The eaves drip will flex to work around gutter brackets and dress into the gutter
- The over fascia ventilators should be fitted along the full length of the eaves and along both sides of the building to create required cross flow ventilation
- For most applications consider using our 6mtr roll out rafter trays to maintain secondary airflow.

Product Range

Description	Ventilation	Height	Length	Pack Qty
1 Metre Over Fascia, Felt Support & Comb Ventilator	10,000mm ²	22mm	1m	10's
