

Data Sheet

Weedcheck Ultra

The product is available in several sizes, please contact your local merchant for details.

Description

Weedcheck is a highly specified Spunbond polypropylene material designed to have the maximum effect on preventing weed growth. It also helps to retain moisture in the soil and stops the various mulches, including decorative aggregates, from being lost into the ground.

Benefits

- A high performance weed control membrane which will stop rhizome growth from penetrating from underneath.
- No need for chemicals when installing
- Water and feed passes through to the soil below
- Low maintenance gardening

Suitable Application

- Aggregate areas
- Pedestrian scree areas
- Flower beds
- Under decking with mulch
- Shrub beds
- Vegetable beds
- Vegetable protection
- Lining plant containers
- Between crooks and compost
- Under artificial grass

Weedcheck Ultra is designed to be covered with a suitable material such as a mulch or decorative stone to protect the membrane from U.V light as soon as possible following installation.

Useful Tips

Best to 'spit' WEEDCHECK vertically at the edges to a depth of 150/200mm
Overlap joins by 120mm.
