

## Data Sheet

### Dry Fix Hip Support Tray

Continuous support to hip tiles above dry fix vent roll

#### Application

- To form a continuous support to hip tiles up the hip of the roof
- Fitted above dry fix ridge kit vent roll
- Hip water drainage tray

#### Product Features & Benefits

- Contributes to meeting requirements of BS5534
- Lightweight and resistant to corrosion and rotting
- Combine with vent roll from dry fix ridge vent kit

#### Materials

- Manufactured in Black/grey PVC

#### Installation Guide

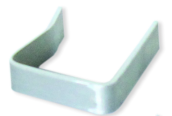

- Build up the roof hip as normal, ensure neatly cut tiles along the hip battens are secured using long and short hip clips as required
- Once the dry fix vent roll has been installed, position the hip support trays centrally over the vent roll
- Start at the lower eaves and trim the first hip support tray to suit the overhang of the bottom course of tiles, secure in place
- Continue working up the hip with the remaining hip support trays
- Ensure a minimum 100mm overlap at each joint, ensure higher hip support trays lap over lower hip support trays
- Continue to install hip support trays to cover full length of hip
- Finish roof as required

#### Product Range

Description	Full Length	Working Length	Width	Height	Pack Qty
Dry fix hip support tray 1.2m	1200mm	1100mm	255mm	30mm	5's
Short hip tile clips	-	-	-	-	20's
Long hip tile clips	-	-	-	-	20's

#### Short hip tile clips:

Used to mechanically secure the cut tiles at the intersection with adjacent tile tiles.

#### Long hip tile clips:

Used to mechanically hold the cut tile up from the base along the hip.
