

# FLUSH GROUNDGRID

Flush Groundgrid is a super-strong and eco-friendly interlocking grid system for various for various applications. Manufactured from 100% recycled plastic with flush base.

## Benefits

- Highest quality recycled plastic
- Heavy duty and lightweight design
- Quick and easy assemble
- Easy to install reducing on site costs
- Proven connection system
- Surface reinforcement with natural drainage
- Minimal maintenance
- Non-slip and crack proof
- Weatherproof and environmentally friendly
- Frost and UV resistant
- Dimensionally stable
- Prevents gravel migration
- Sustainable
- Non expanding
- 100% recyclable

## Intended Use

- Construction sites
- Green car parking areas
- Private lanes and access roads
- Pathways and drives
- Golf courses
- Landcapes
- Equestrian and livestock facilities
- Green roof and rooftop gardens
- River and road embankments
- Private airfields

## Technical Data

Material	PE/PP
Height	40mm
Size	570x380mm
PCS/M2	4.6
Weight/PCS(KG)	1kg
Wall Thickness	6mm
Load Bearing Capacity	400T/m2
Axle Load (KN)	120 kN
Green Area Ratio	87%
Colour	Black
